PROFESSIONAL SUMMARY

Software Quality Engineer and **SDET** with **2.5+ years of experience** in **manual testing, test automation, and API testing** across Healthcare, ERP, HRMS, and Document Management web applications. Currently testing the **Availity healthcare portal** (US patient management) at **Infosys** using **Playwright with TypeScript** and **Java Selenium**. Skilled in building **hybrid Selenium WebDriver, TestNG, and Maven frameworks**, REST API automation with **Rest Assured and Postman**, **SQL** backend validation, and **Jenkins CI/CD** integration. Strong in **Agile/Scrum** delivery, test planning, defect triage, and release readiness, using **AI tools** (ChatGPT, Microsoft Copilot, Google Gemini) to speed up test design and bug analysis.

TECHNICAL SKILLS

Test Automation: Playwright, TypeScript, Selenium WebDriver, Java, TestNG, Maven, Cucumber (BDD, Gherkin), Selenium ATAF, Page Object Model (POM), Page Factory, Data-Driven, Keyword-Driven and Hybrid Frameworks

API Testing: Postman, Rest Assured, REST APIs, CRUD operations, JSON/XML payload and schema validation, status codes and headers, OAuth2, JWT, Basic Auth, API mocking, data-driven API tests (Excel/JSON)

Testing Types: Functional, Regression, Smoke, Exploratory, UAT, Cross-Browser, Database/Backend, Performance testing basics (JMeter)

QA Process: STLC, SDLC, Defect Life Cycle, Test Planning, Test Case Design (Boundary Value Analysis, Equivalence Partitioning, Decision Table, State Transition), Defect Triage, Root Cause Analysis (RCA), Agile/Scrum

Programming: Java (OOPs, Collections, Exception Handling, File I/O, Generics, Multithreading, Java 8 Streams and Lambdas), TypeScript, SQL; coding practice in strings, arrays, sorting algorithms, and SOLID principles

Database: SQL queries, Joins, CRUD operations, Stored Procedures, Triggers, UI-to-database data validation, normalized schemas

CI/CD and Tools: Jenkins, Git, GitHub (branching, merging, PR reviews), Docker (basics), Linux commands, BrowserStack, Sauce Labs, Jira, Bitrix24, Confluence, MS Excel

AI Tools: ChatGPT, Microsoft Copilot, Google Gemini for test case generation, bug analysis, and code optimization

Domains: Healthcare (US patient management), ERP, HRMS, Document Management Systems

PROFESSIONAL EXPERIENCE

Software Quality Engineer

Nov 2025 – Present

Infosys Limited

Bhubaneshwar, Odisha

- Tested the **Availity UI healthcare portal**, a US patient-management system, across key web application workflows.
- Designed and executed **300+ manual and automated tests** across functional, regression, exploratory, UAT, and cross-browser coverage.
- Automated UI scenarios using **Playwright with TypeScript** and **Java Selenium ATAF** to strengthen regression coverage.
- Reported and tracked **100+ defects** with developers and a **100-member delivery team**.
- Supported release readiness through **sprint test planning, execution, and defect triage**.

Software Test Engineer

Feb 2023 – Dec 2024

Dietary Business Intelligence Pvt. Ltd. (formerly Jeeva Organic Pvt. Ltd.)

Bhubaneshwar, Odisha

- Designed and executed **300+ test cases** across functional, regression, and UAT phases, achieving **97% defect detection**.
- Developed and maintained a **hybrid automation framework (Selenium WebDriver, TestNG, Maven)**, reducing regression time by **60%**.
- Automated **50+ UI test scenarios** using WebDriver waits, locator strategies, and reusable Java methods.
- Performed **API testing and automation with Postman and Rest Assured**, validating **50+ REST endpoints**.
- Integrated the automation suite with **Jenkins CI/CD**, embedding regression testing into delivery workflows.
- Performed **SQL-based backend testing** to validate data across multiple relational modules.
- Tracked and resolved **150+ defects** with developers using **Jira and Bitrix24**.
- Mentored junior testers on **Java coding practices for automation** and Agile QA methodology.

PROJECTS

Zyler ERP Suite zylererp.com <i>Dietary Business Intelligence</i> - Automated 50+ test workflows, reducing the regression cycle by 60%. - Used the Java Streams API for test data filtering and validations. - Resolved 80+ defects during UAT, improving application stability by 45%.	May 2023 – Dec 2024
AsterDocs Document Management System asterdocs.com <i>Dietary Business Intelligence</i> - Led testing of document upload, approval workflows, and role-based access with 100% requirement coverage. - Built Java utilities for file handling and exception-safe automation scripts.	Feb 2023 – May 2023
ConfluxHR Human Resource Platform confluxhr.com <i>Dietary Business Intelligence</i> - Tested attendance, payroll, and employee modules with 100+ test cases. - Automated REST API validation using Postman and Rest Assured. - Logged and tracked 70+ defects in Jira, achieving 98% resolution.	Feb 2023 – May 2023

EDUCATION

Civil Engineering CGPA 8.5 <i>Sophitorium College of Engineering, Khorda (Biju Patnaik University of Technology, Rourkela), Odisha</i>	2018 – 2021
